

Andy Young

a7young@ucsd.edu | (808) 218-8306 | andyluyoung.com | github.com/ayoung19

Education

University of California, San Diego

B.S. Computer Engineering

Sep 2019 - Jun 2023

La Jolla, CA

- **Major GPA:** 4.0

Experience

Verkada

Software Engineer Intern

Mar 2022 - Jun 2022

San Mateo, CA

- Designed and developed the entire front and back end of Mustering, a feature in access control systems for tracking the locations of users in emergency situations, using **React + Typescript, Python, Go**, and **PostgreSQL**.

Flexport

Software Engineer Intern

Jul 2021 - Sep 2021

Chicago, IL

- Built a feature that allows Flexport's operations specialists to view the history and metadata of date changes in a shipment's route using **React + Flow, Java**, and **GraphQL**.

Okta

Software Engineer Intern

Apr 2021 - Jul 2021

San Francisco, CA

- Eliminated tech debt in Okta's **React + TypeScript** monorepo by extracting repeating internationalization code into a reusable package with a robust API and created a performance logging system using **Node.js** that automatically uploads a weekly Lighthouse report of any pre-production site to an **Amazon S3** bucket for teams to view.

PINT

Software Engineer Intern

Oct 2020 - Jan 2021

San Diego, CA

- Developed automated QA tools with **Node.js** and independently created a responsive 12-page website for a client using semantic **HTML** and completely custom **CSS**.

ADP

Contract Web Developer

Jul 2019 - Sep 2020

Honolulu, HI

Dominos Pizza

- Used **Node.js** and **MongoDB** to create a webapp that uses data from 500+ employees of Dominos Hawaii to automatically perform a weighted distribution of tips, generate payroll sheets for ADP, and track healthcare eligibility.

Tory Roofing

- Automated and digitized Tory Roofing's employee/job management system and payroll process by developing a webapp using **Ruby on Rails** that allows foreman to submit timesheets on an intuitive mobile UI and managers to review and automatically perform the payroll every week.

Projects

This Tab Helps The Planet | this-tab.com

Winter 2018

- Created a webapp using **Ruby on Rails** and chrome extension using **JavaScript** that allows users to donate money generated by viewing ads on their new tab page to charities of their choice.

Online Capture The Flag | node-ctf.herokuapp.com

Spring 2017

- Developed a lightweight online real-time multiplayer capture the flag game using **Node.js** and socket.io.

OP.GG Search | opgg.andyluyoung.com

Summer 2016

- Created a Chrome extension with **JavaScript** as a freshman in high school, which currently has 5,000+ users, that adds extra features to a League of Legends statistics website.

Skills

- **Languages:** JavaScript, TypeScript, Python, Ruby, Java, C, C++, Go, Haskell
- **Frameworks:** React, Node, Flask, Rails, Spring
- **DBMS:** MongoDB, PostgreSQL, GraphQL
